Slides material developed by Ilchul Yoon, Nelson Padua-Perez

# Revisiting fetch (Node.js)

---

- You can use fetch in Node.js (you don't need to install any modules)
- In the past, we rely on **node-fetch**
- **Example:** getJSONProblem.js (Problem: we cannot see the results back in main())
- **Example:** fetch1.js, fetch2.js
- **Example:** fetch3.js (using fetch, instead of node-fetch)
